

Pointers/Arrays in C

Practice what you have learnt

Instructions

In one word, try to describe your experience of programming

A word cloud of programming experiences. The words are arranged in a cluster, with 'difficult' and 'tough' being the largest and most prominent. Other words include 'catastrophic', 'interesting', 'challenging', 'curious', 'terrible', 'fraking', 'hard', 'stupid', and 'unknown'. The words are in various colors and orientations, creating a dynamic visual effect.

difficult

tough

catastrophic

interesting

challenging

curious

terrible

fraking

hard

stupid

unknown

Questions from the previous lecture on arrays

What is the output of the statement `printf("%p\n", &b);` in the program below

```
int main() // void means nothing
{
    int a = 10; int b =20;
    int *ptr1, *ptr2;
    ptr1 = &a;
    ptr2 = &b;
    printf("%d\n", *ptr1);
    printf("%p\n", ptr2);
    printf("%p\n", &a);
    printf("%p\n", &b);
    return 0;
}
```

What is the output of the statement `printf("%d\n", *((int *)ptr2));` in the program?

```
int main() // void means nothing
{
    int a = 10; int b =20;
    int *ptr1, *ptr2;
    ptr1 = &a;
    ptr2 = &b;
    printf("%d\n", *ptr1);
    printf("%p\n", ptr2);
    printf("%p\n", &a);
    printf("%p\n", &b);
    return 0;
}
```
